## Bilateral Meetings

- (10:15 - 12:15) Morning session

### Description

The company is located in Saxony near the Czech border. As a medium-sized family business we are active for many years on the market. We focus on project-related custom made individual productions and offer complete solutions from one source including consulting, stone technology, the extraction of Elbsandstone from six of our own quarries, all stonemasonry, sculpting and restoration work to the installation of modern facades and solid elements. We work with traditional handcrafted production as well as with digitally controlled machines. We can scan ornaments and sculptures, process them into 3D visualizations and develop processing programs for our CNC-controlled 5-axis machines. To complete our service we also do quantity determinations, the creation of specifications and damage mapping in the field of monument preservation.

We have already experience in cooperation with Czech subcontractors in projects in the Czech Republic in the field of preservation of heritage buildings.

### Offer & Request

#### **offer of products & services and search for subcontractors in the field of sandstone**

We would like to cooperate with companies that deal with the restoration of buildings in the field of natural Stone and welcome new customers.

We can offer experience in the field of heritage protection and can already refer to referential projects in the Czech Republic.

Therefore we are able to offer a high quality product: our Saxon sandstone is already approved bei the Czech Monuments Protection Authorities.

**We have worked with Czech subcontractors in the Czech market as well and are looking for further partners as subcontractors for heritage preservation projects in the Czech Republic. Potential partners should be specialized in the assembly of natural stone, preferably stoncutters or stonemasons.**

**Keywords: stonecutter stonemason**
