Bilateral Meetings

- (10:15 - 12:15) Morning session

Description

Locksmithy and restoration workshop for objects made out of metal. Our extensive collection of historical locks, old keys, door- and window fittings, decorative elements, doors and ironmongery - from the Gothic period up to now - makes us unique. Situated in Radebeul by Dresden, our collection grew over a period of twenty years. Come visit us and have a look around.

We collect, deal and repair various metal objects such as: door and furniture locks - antique safes - war chests - gramophones - music boxes - cash registers - lamps - candlesticks - and many other objects. We manufacture special designs and replicas of anything our clients might need: vintage door knockers, railing brackets, window fittings (e.g. for lamellar windows) or caps to camouflage modern screws. Production of replicas according to original patterns.
